

Mapping of regional case studies on gender integration in government health programs

Following an open call, desk review, and interviews with key stakeholders, our team at UNU-IIGH, Public Health Foundation of India, and the University of Western Cape in South Africa, curated a list of case studies on gender integration in health in selected countries in Africa, South Asia, and Southeast Asia. This table provides a list of case studies collated from the South Asian region. This list is part of the initial screening and will undergo further review and analysis to identify successful case studies.

Country	Name of the program	Program description	Source	Links
India	Do Kadam	This program evaluated boys' attitude to gender roles and GBV against women through gender transformative life skills curriculum	Desk review	
India	Pehchan	This program aimed to strengthen community systems and provide HIV, health, legal and social services to transgender communities across 18 Indian states through a rights-based empowerment approach	Desk review
